### DESCRIPTION OF THE COMPLAINT:

As per my email to [info@greekanimalrescue.com](mailto:info@greekanimalrescue.com), during a walk to Giali Beach (Chalki Island – Rodos) a couple of kilometres far from Chorio, I found few metres before the beach s a hovel (a chicken coop) where there are 4 dogs chained under the sun (more than 30 degrees...).

The chain is 1 meter long and they cannot move. They could just bark to me.

I have tried to find someone but none was there.

I think they should be free to move and provided by water and food (they are skinny).

Although is a lonely and not easy to be reached place, I kindly ask you to send someone to check and put in a safe and “healthy” situation the poor animals (there is a lot of space and they could be set in a lance) as the sheeps and goats are.
